Subject: Microsoft Settlement

I am thoroughly opposed to the settlement that has been reached between the Justice Department and Microsoft in the Antitrust case. Microsoft is, without a doubt, a monopoly that has abused its power and will continue to do so unless it is reigned in by the government. Microsoft corp. does not compete on the merit or value of its software, but by using unfair tactics to get where it wants.

Any settlement, etc. in this case should set very clear rules that Microsoft must adhere to. It should also set forth punishments for past and/or future abusive action. Please do not allow this settlement.
